This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFATORY NOTE.

THE following Tables were compiled, about fifteen years ago, mainly with a view to assist students in associating the leading events and literary works of modern Europe with each other. The want of a sufficiently clear tabular representation of the relations of History and Literature appears to be among the causes of the confusion so often exhibited regarding the most elementary dates. One of the greatest, among several, difficulties, in the arrangement of these Tables has been the necessity of selection and variation of scale. It being obviously impossible to keep the same proportion of space in ages when comparatively few events or works in a generation remain on record, and in others, such as our own, the scale varies, from centuries in the earlier to periods of five years in the later sheets.

The further principles of the system of tabulation may be shortly stated :—

I. English Literature and History are placed together to be illustrated by the columns on either side.

II. The names of statesmen or authors are on the line, as far as the exigencies of printing have permitted, of the date at which they exerted their greatest influence.

III. In the Historical columns the dates indicate—

A. The year in which events occurred.

B. The accessions and deaths or abdications of monarchs.

C. The periods of power of statesmen.

(Except where enclosed in brackets ( ) which indicate the dates of birth and death.)

IV. In the columns of Literature, Science, and Art, the dates without brackets indicate the birth and death.

Occasionally one of these being uncertain, the birth is marked B—, or the death D—. Both being uncertain or unimportant, a single date is given as a "floruit," generally that of the chief work of the author. Several American writers, whose precise dates have not been discovered, have been ranged together at the end of Table XX.

V. An attempt has been made to indicate the importance of the author, potentate, or event by the size of the type. The accuracy of the judgment in this case must remain matter of opinion. I am responsible in the columns of History and Literature; my better informed coadjutors in those of Science and Art. In the last two European Tables, largely concerned with contemporaries, a distinction which might be invidious has been abandoned, and all living writers or artists are printed in the same ordinary type. A rule has been made to include only those whose reputation has been established for at least ten years. In crowded departments of literature, as Romance, only representative names have been selected. A few are inserted rather in deference to popular judgment than in accordance with my own estimate.

VI. Several names being repeated, sometimes at no great intervals, it has been considered essential to the pictorial representation aimed at, to distinguish by different colours, those associated with different nations. Practical obstacles have restricted the application of this rule; but it is hoped that the result will, even by the appearance of the pages, convey some indication of the historic issues at stake.

VII. When a writer has been very prominent in two departments, as of Science and Philosophy, or Literature and Art, as in the case of Leonardo da Vinci, Leibnitz, Descartes, and Pascal, his name appears in two columns. When his eminence in one eclipses that of his reputation in another, he appears, as in the case of Bacon and Galileo, only in that where he was pre-eminent. In rare instances a great name has been inserted, slightly out of its exact place, at the head of the period which the author's influence seems to have dominated.

The reception of the earlier editions has made me sensible at once of the utility of an undertaking, involving an amount of labour only inferior to that of compiling a dictionary, and of the hazards to which it is exposed. To many of my critics I am indebted for corrections of mistakes almost inevitable, and for supplying sometimes serious omissions. Others have made of an obviously rapid survey occasion to air crotchets, as that which regards it as a crime to speak of "Ancient History," or of "Charlemagne." It seems needful to state that the phrase "English Literature" here signifies Literature originating in England, and that "in power" indicates the period of a politician's greatest influence, in or out of office. To avoid cavil I now append the dates of the chief Prime Ministers, with the protest that I can only record the chief. For details which, as expressly stated, are excluded from the design of the work, I refer my readers to the "Annual Register."

This Edition, as the last, has undergone extensive revision. Four Tables of American History and Literature have been added, and two new columns have been inserted. One of these (the distinctive feature of this edition) aims at being an

epitome, as far as that can be accomplished by names and dates, of the history of Modern Science and Invention: while the other, that of the Fine Arts, designs to present a condensed view of the progress of Architecture, Painting, Engraving, etc.

My obligations in pursuance of a task, more properly belonging to an Academy or an Institute, are too extensive to be detailed. I have more especially to acknowledge those to Dr. Charles Grindrod of Malvern, to whose special capacity I am indebted for the column of the Fine Arts, to Mr. Craibe Angus for lists of recent French and Dutch painters, and to Mr. William Sharp for important additions. I owe the proximate adequacy of the chemical catalogue to Prof. John Ferguson, who has supplied me with special lists, besides his numerous recondite pamphlets. Dr. M'Kendrick has generously allowed me the free use of his Tables of the History of Physiology. I have to thank Mr. W. R. Jack and Dr. George Dickson for a careful catalogue of medical and surgical names. I have to repeat the expression of my old obligation to Prof. W. A. Ward of Victoria University for invaluable assistance in the historical columns, and to Prof. MacCallum of Sydney University for numerous suggestions in reference to old English and French Literature.

In this Edition every date has been, as far as possible, verified by the comparison of various and often conflicting authorities—*e.g.*, a single author has in some cases assigned to him half-a-dozen different dates; and some names—as those of Jacob Bœhmen and Christian Huyghaens—are spelt in almost as many different ways. In this part of the compilation now, I trust, fairly accurate, I have been assisted by the careful research of Mr. Robert, and Miss, MacLehose, whose zealous co-operation makes this edition, in great measure, our joint work. They or I have with regard to every important event, name, or work, consulted the books in the annexed list, assigning on points of dispute, a generally preponderating authority to the three first named.

EXPLANATION OF COLOURS, ETC.

1. ROMAN, GERMAN, and AUSTRIAN EMPERORS and KINGS,	RED LINES.
2. PRUSSIAN KINGS and MINISTERS,	RED BARS.
3. FRENCH KINGS and MINISTERS,	BLUE LINES.
4. SECULAR RULERS in ITALY,	BLUE BARS.
5. SPANISH KINGS and RULERS,	YELLOW LINES.
6. POPES,	YELLOW BARS.
7. PORTUGUESE KINGS and RULERS,	YELLOW DIAMOND LINES.
8. RUSSIAN MONARCHS,	GREEN LINES.
9. SCANDINAVIAN MONARCHS,	GREEN BARS.
10. RULERS in the NETHERLANDS,	BLACK BARS.
11. SWISS LEADERS, ETC.,	BLACK DIAMOND LINES.
12. ENGLISH KINGS,	RED DIAMOND LINES.
13. SCOTCH KINGS,	BLUE DIAMOND LINES.
14. IRISH LEADERS, ETC.,	GREEN DIAMOND LINES.

In several cases other leading men and great events are underlined with the colours belonging to the nations most directly affected by them, or to which they have been most attached. The Presidents of the United States are marked in capitals according to their eminence, the States have a special type, and the thirteen original States are underlined. The artists have appended to their names (*p*) for painter, (*a*) for architect, (*engr*) for engraver, (*et*) for etcher, (*sc*) for sculptor, (*m*) for musician, (*voc*) for vocalist, (*vio*) for violinist, and (*ac*) for actor. In the Science column great mathematicians or physicists have no special mark; but (*geo*) indicates geologist, (*bot*) botanist, (*chem*) chemist, (*med*) physician or surgeon, and (*eng*) engineer. A few names of authors or artists born in Europe, but who have done their main work in America, are inserted in the American tables.
